Subject: MC-12 P/N'S TO BE SUPERCEDED AND OBSOLETE APRIL 1

The MC-12 Trailer ABS is being replaced with the MC-30 system offering more configurations and additional features. To service the MC-12 with an MC-30 you must replace both the Modulator/Controller and the pigtail since new connectors are used for the added functionality. These are available in kit form.

Use the following P/N's for cross-reference in servicing the MC-12.
