Subject: **NEW FMSI NUMBERS IN THE MEDIUM TRUCK
CATEGORY**

The above numbers are new FMSI numbers in the medium truck category. These late model numbers are front axle sets that fit vehicles that must comply with FMVSS 121.

To completely comply with FMVSS 121, engineering has released a new formula for medium truck applications and this material will be known as ED-121. The above listed numbers are on the shelf and ready to be shipped in this new ED-121 formula.

Since ED-121 is presently being used by some of the OE manufacturers, we know that its quality and performance will meet the needs of your customers.
