## Subject: **FD-1 FAN CLUTCH 6-71 DETROIT DIESEL ENGINE**

While our vehicle application data brochure (BW 1275) lists some kits for GMC, IHC, Kenworth and White vehicles equipped with 6-71 Detroit Diesel engines, the usage of 6-71 engines (as reported by vehicle manufacturers) has been very small. Because of the limited use of the 6-71 engine, kits are limited to those listed in our Vehicle Application Data (BW 1275). If a vehicle with 6-71 engine is not covered by a kit, there is a good possibility that Fan Clutch Pc. No. 288938 will fit. Check the Detroit Diesel hub assembly part number, and if the hub assembly is one of the numbers listed below, 288938 Fan Clutch can be used.

### DETROIT DIESEL HUB ASSEMBLY

5100557	
5100985	
5100988	Use
5103594	288938
5131209	Fan
5133614	Clutch
5137615	

These installations may require the use of spacers 292312, 292313 (or both) which should be purchased separately.
