Subject: **New Formula Blue® Caliper Part Number Added**

Bendix Spicer Foundation Brake is adding a new semi-loaded remanufactured caliper part number to our Formula Blue® offering. This new Formula Blue® part number is **E14685009** and will be available for orders effective January 1st, 2010. Its' core group number is **69**.

This new caliper assembly can be used interchangeably with the Formula Blue® part number E14685008, replacement for the Bendix® 2.88" twin-piston caliper – Bendix® part number 55250. Although the assemblies are interchangeable the component designs of the E14685009 and E14685008 are not the same, including machining differences which do not allow interchangeability of maintenance kits, components and therefore cores.

The new Formula Blue® caliper, part number E14685009, is similar to the pre-1989 design with phenolic pistons and a unique "soft boot". This differs from the Formula Blue® part number E14685008 (replaces Bendix® part number 55250) which has phenolic pistons and a "hard boot" with a metal insert. Caliper part number E14685009 is being made available for customers returning the 'soft' boot cores. Returning such cores will establish core eligibility in core group number 69.

Refer to Technical Bulletin TCH-020-018 for additional technical information pertaining to the calipers.

Vintage	Boot Style	Casting Number	Part Numbers		Core Group	Availability
			Bendix®	Formula Blue®		
1989 - current	"Hard"	4150844	55250	E14685008	22	Currently Available
Pre-1989	"Soft"		N/A	E14685009	69	Available to be ordered effective January 1, 2010
