Bendix® Spring Brakes and Service Chambers with Welded Clevis

Faster Installation, OEM Specifications.

Trucks on the road help add to your bottom line. So, to help you speed up maintenance and decrease downtime, use Bendix® brand spring brakes and service chambers with welded clevis push rods.

You'll save time and money when you choose these reliable, durable service replacement parts. Since there's no need to cut push rods or re-use worn components, installation is fast and easy. And, you can have confidence in their performance because they meet OE quality standards.

Our service parts deliver peace of mind—you know you're using the correct push rod length with the proper brake shoe-to-drum clearance.

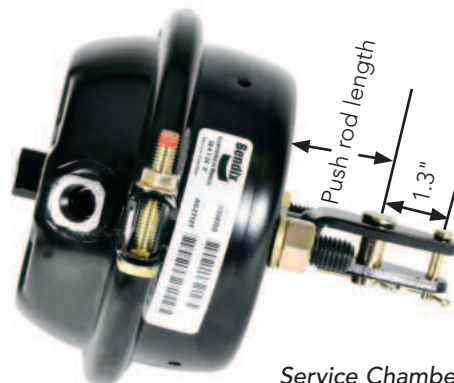

Plus, when you choose a Bendix® EverSure® Spring Brake, you have access to our exclusive No Touch™ technology. Our innovative design:

- Increases the height between power spring coils, helping avoid damaging contact to the protective coating on the spring
- Addresses the leading cause of spring brake failure by increasing power spring life
- Is the lightest spring brake in the industry

Bendix brand spring brakes and service chambers are brought to you by Bendix Spicer Foundation Brake (BSFB), your single complete source for brake system design, manufacturing, hardware and support for all foundation drum components and actuation systems.

EverSure® Spring Brake with welded clevis

Service Chamber with welded clevis
