Subject: **New Gasket for Bendix® Inlet Check Valves (ICVs) Used for BA-921™ Compressors (Detroit Diesel Applications)**

As a product improvement for the Bendix Inlet Check Valves (ICVs) used for BA-921™ compressors, Bendix is now implementing a new gasket design and material as a running change in all assemblies and kits.

All new orders for service replacement ICV assemblies will feature the new gasket, spacers and longer bolts.
