Subject: Core Group Revisions – Brake Shoes and Calipers

In order to ensure that we have an adequate flow of cores to meet our customers demand, we have made some minor modifications to our Brake Shoe Core Groups. The revised core groups are listed below.

In addition, part number R 55717 is being moved from Core Group 24 to Core Group 21 (same core value). In certain instances, customers are using the R 55717 in an R 55314 (Core Group 21) application which is causing core discrepancies. Until fully implemented, when returning either of these cores, the customer can denote on their CRM which group should be credited. These revisions will be effective 4-1-06.
