Linings

VIPRO™ by Bendix® Linings – A great program just got even better.

For years, Bendix and VIPAR® have partnered to deliver VIPRO™ by Bendix® linings. These quality linings, available exclusively to members of the VIPAR network, deliver consistent stopping power for every application, and are available at an economical price.

Now, there's a great reason to take another look at the VIPRO by Bendix program. Bendix has brought their reman brake shoe operations in house. So, VIPRO by Bendix shoes are produced at the new Bendix Brake Shoe Remanufacturing Center under the same rigorous standards required by Bendix and their OEs.

Select the friction that's right for you.

These frictions are designed for single axles from 20,000 lbs. up to a maximum of 23,000 lbs. and tandem axles from 40,000 lbs. up to a maximum of 46,000 lbs. GAWR. All VIPRO by Bendix linings meet FMVSS 121 testing standards, and are certified using an AL 165 factor.

VIPRO™ 20K Standard Linings

The VIPRO 20K Standard lining provides consistent performance in day-to-day continuous service markets using single axles up to a maximum of 20,000 lbs. and tandem axles up to a maximum of 40,000 lbs. GAWR. The VIPRO 20K Standard is ideally suited for light- & medium-duty applications, such as dry freight, inter-modal leasing, and general highway hauling.

- Good stopping power
- Good fade characteristics
- Good lining life

Applications

Conventional Line Haul	Tandem Axle Truck	Flatbed
------------------------	-------------------	---------

Comparable Linings*

Meritor® MG1	Abex® 6166	Fras-le® 550	FleetPride® OTR BLU
TruckPro® Armada AR2	Stemco® Crest XL	BrakePro® CM15	Marathon® UB
Haldux® GD 2016 FF	GBC® GB20		

VIPRO™ 20K Premium Linings

The VIPRO 20K Premium lining provides excellent performance in demanding highway applications and in mountainous terrain. The VIPRO 20K Premium lining is a multi-application, all makes lining for single axles up to a maximum of 20,000 lbs. and tandem axles up to a maximum of 40,000 lbs. GAWR.

- Excellent lining life
- Quiet operation
- Long drum life
- Low thermal expansion characteristics

Applications

Conventional Line Haul	Tanker	School Bus
Beverage	Flatbed	Pick-up & Delivery

Comparable Linings*

Meritor MG2L	Abex 6008	Fras-le 555	TruckPro Armada AR2
BrakePro CM16	FleetPride OTR BLU	Marathon DB	Haldux GF 3008 FF

VIPRO™ by Bendix®
Reman Brake Shoes are
produced in the U.S. at a
state-of-the-art 70,000
square foot facility.

**Performance of friction will vary based on vehicle type, load, terrain, and driver. Cross reference information is provided as a reference only and is not indicative of equal performance characteristic.*

Economical, consistent stopping power for every application.

VIPRO™ 23K Premium Linings

The VIPRO™ 23K Premium lining is a medium to high friction formulation which provides excellent stopping power in demanding applications. VIPRO 23K is a multi-application lining for single axle applications up to a maximum of 23,000 lbs. and tandem axles up to 46,000 lbs. GAWR.

- Excellent lining life
- Long drum life
- Quiet operation
- Excellent fade resistance

Applications

Line Haul/Heavy Line Haul	Tri-Axle Dump	Tanker	Multi-Axle
Bulk Hauler	Mixer Truck	Roll-Off	

Comparable Linings*

Meritor® MG2	Haldex® GG 3023 FF	Fras-le® 555	Marathon® HS	GBC® GB23
TruckPro® Armada AR4	FleetPride® OTR RED	BrakePro® CM18	Abex® 685	

Application Notes: Some Heavy Duty 23K applications can require a Severe Service lining material based on specific application. See BW7328 on the Bendix Literature Center at www.bendix.com for applicable Severe Service material.

**Performance of friction will vary based on vehicle type, load, terrain, and driver. Cross reference information is provided as a reference only and is not indicative of equal performance characteristic.*

With this exclusive program, VIPRO™ by Bendix® has your friction needs covered.

Bendix delivers OE quality in a reman brake shoe.

Bendix (Bendix CVS and Bendix Spicer Foundation Brake) is a leading OE supplier, bringing more than 35 years of remanufacturing expertise and 85 years of innovative wheel-end solutions to our reman brake shoe operations. In the past two decades, we've produced more than 40 million OE brake shoes, and are the standard brakes on Kenworth®, Peterbilt®, Volvo® and Mack® vehicles.

Quality in every detail.

Every shoe is coined, a process that returns the shoe to OEM tolerances. Our next generation coatings combat corrosion and virtually eliminate rust jacking. To select high quality, durable friction we go beyond industry standard friction testing to conduct our own proprietary testing.

Our OE process helps prevent the problems associated with cracking, as well as loose lining and rivets. To confirm that our shoes meet our standards and deliver reliable performance, our inspection and testing procedures go beyond industry norms. With more than 75,000 shoes readily available in inventory and three North American distribution centers, our customers have fast and easy access to the products they need.
