Bendix®

Bendix® Remanufactured Brake Shoes

Bendix brings the very best to remanufactured brake shoes

As a leading OE supplier, Bendix brings nearly 85 years of innovative wheel-end solutions and more than 35 years of experience remanufacturing the industry's best compressors, air dryers and valves to bear when it comes to our reman brake shoe operations.

Experience counts when it comes to making quality brake shoes. Bendix has designed and produced more than 40 million brake shoes over the past two decades.

The brake shoe production process at our state-of-the-art, 70,000 square foot Brake Shoe Remanufacturing Center in Huntington, IN, adheres to the same rigorous Six Sigma systems as every other Bendix product. You can be confident that the parts you choose to service your vehicle are the same high quality parts as those used to build it.

Exceptional post sales support

With over 75,000 shoes readily available in inventory, and three strategically located North American distribution centers, you'll enjoy fast and easy access to the products you need. After the sale, we're here to support you with field-tested sales and service professionals, a 100% ASE-certified field technical support team, and the Bendix Tech Team, available on our expert technical support phone line at 1-800-AIR-BRAKE. Plus, you can log on and learn from the best in braking. Visit www.brake-school.com.

Everything you expect from Bendix

With Bendix reman brake shoes you get it all: a reliable and durable product, performance you can count on, reduced downtime and lower total cost of ownership. And, of course, the incomparable peace of mind that comes from choosing brake shoes remanufactured by the brake experts at Bendix.

Made in the USA
Bendix® reman shoes are produced at our 70,000 sq. ft. facility in Huntington, Indiana.

Find out more about the OE quality, performance and savings opportunities you get when you choose Bendix remanufactured brake shoes. Talk to your Bendix account manager, call 1-800-AIR-BRAKE (1-800-247-2725), or visit www.foundationbrakes.com today.

Bendix® Remanufactured Brake Shoes

Using in-house dynamometers,
Bendix conducts industry standard
friction testing and our own
proprietary procedures.

All reman brake shoes are not created equal

As a full service OE provider, we know brake shoes. So we bring all the key elements together to give you the very best remanufactured brake shoe. From coining, coatings, and friction, to inspection before the shoe leaves our plant, there's quality built in every step of the way. It all adds up to reliable performance, safety, reduced downtime, and less risk to your CSA scores.

Bendix coatings–your best defense against rust jacking

To ensure maximum performance today and down the road, all Bendix reman brake shoes feature our exclusive coatings. Our coatings are proven in the lab and on the road, to give you the best line of defense against rust jacking and cracked friction.

Bendix friction materials: precision designed and tested

With decades of experience meeting the demands of OE friction certification, Bendix is your friction expert.

In-house dynamometers are just one factor that sets us apart from the average friction manufacturer and regional reliners. These capabilities allow us to go beyond industry standard tests to conduct our own proprietary friction testing. It's our name on the friction

block, so we only select the best performing, high flexural strength friction that resists cracking.

Full range of friction offerings

Regardless your application or budget, Bendix has a friction to deliver the performance you need. From economy grade and extreme duty friction to reduced stopping distance solutions and OE replacement linings, we've got you covered.

OE-quality riveting

Experience counts. Bendix rivets three million shoes—for a total of 84 million rivets—per year. Our OE process helps prevent the problems associated with cracking, as well as loose lining and rivets. To confirm that shoes meet our standards, our inspection and testing procedures go beyond industry norms to ensure that the friction is properly attached, and will stay that way.

Bendix® Basic Friction	Bendix® Advanced Friction	Bendix® OE Friction
<ul style="list-style-type: none">• Excellent value at an economical price• Good wear and consistent performance under normal operating conditions, in low- to mid-range temperatures	<ul style="list-style-type: none">• Performs in higher temperatures with less fade• Improved wear characteristics in more demanding applications• Lower total cost of ownership• Includes RSD solutions	<ul style="list-style-type: none">• The safest, highest performing option for maintaining your vehicle• Engineered to meet the demands of OE certification• Includes RSD solutions

All Bendix friction is FMVSS 121 compliant and certified utilizing an AL 165 factor (T30 chamber and 5.5" slack adjuster).
